

Quinn Verdict Review Petition

British Columbians are demanding that the Attorney General consider a formal review of the recent decision in *R. v. Quinn*, in which Madam Justice Wendy Baker acquitted the accused, Katherine Anne Quinn on a charge of second degree murder.

It is our position, as law abiding citizens of Canada that her Ladyship Justice Baker may have erred in her decision.

To absolve Katherine Quinn of any and all wrongdoing in the violent murder of 16 year old Matthew Martins by finding her "not guilty" is an abomination of an already questionable legal system.

We will no longer stand for such gross injustice in our B.C. courts! We have a responsibility to all citizens and especially the victims and families of malicious attacks and murders.

Mr. de Jong, it is your duty to maintain justice in this province.
