

Operation Fast and Furious

In Operation Fast and Furious ATF agents were caught selling guns to the Mexican cartel and bringing back tons of cocaine as payment.

It made big news in the US when a US border agent was killed with one of those guns. The fact that they brought tons of cocaine into the country was barely mentioned.

This is the same thing that was done in Operation Wide Receiver. It is exactly what the agency was doing in Mena, Arkansas and in Iran contra. That is a threat to national security.

Obama has sealed all the documents related to this scandal under executive privileged. Nixon would never have been allowed to hide Watergate under executive privilege. It's time we woke up and started defending the Constitution and the Charter of Rights.
