

Cross Border Policing

The Canada-US maritime policing pact infringes on Canada's sovereignty. Armed US Border agents are working in Canada helping with pre inspections. They are objecting to having to abide by Canadian laws and want diplomatic immunity while they work here.

Inspecting vehicles at the border is very different than policing your country which is what the policing pact involves. No doubt Americans would be concerned about Canadian police officers enforcing the law in the US without being bound by the law themselves. That is a violation of our liberty.

We have a bad enough problem with Police misconduct in Canada to let any police force work here without being bound by the law. Giving any police force diplomatic immunity to operate in your county without any legal accountability is absolutely insane.
